

# Dedicated server hosting

Let us care for the heart of your IT or even provide you with hardware-as-a-service.

**nst**  
IT SOLUTIONS

**Our** dedicated server hosting capability enables you to ensure your expensive IT resources are safe and sound. We can also offer you hardware resources on a rental basis, reducing your capital investment in IT. We have dedicated space in state-of-the-art facilities available to you, across 3 states. Supported servers are current generation rack mount products from Cisco, Dell, HP and IBM. Ancillary utilities such as network switching or routing, firewalls and storage can be supplied to you as a service, or your own equipment can be hosted alongside your dedicated servers.

- BUSINESS CONTINUITY AND  
DATA BACK UP
- SIMPLIFIED GROWTH
- SUPPORT – INFRASTRUCTURE AND  
FACILITY OPERATED ACCORDING  
TO ITIL BEST PRACTICES
- LIMITED INVESTMENT IN IT SKILLS  
REQUIRED

## WHY OUTSOURCE HOSTING?

It allows you to focus on moving your business forward, and do what you do best. Your staff can focus on strategic initiatives that are important to the business. It's a tactical decision, and allows you to benefit from the latest technology, reducing costs and improving efficiency.

## FEATURES

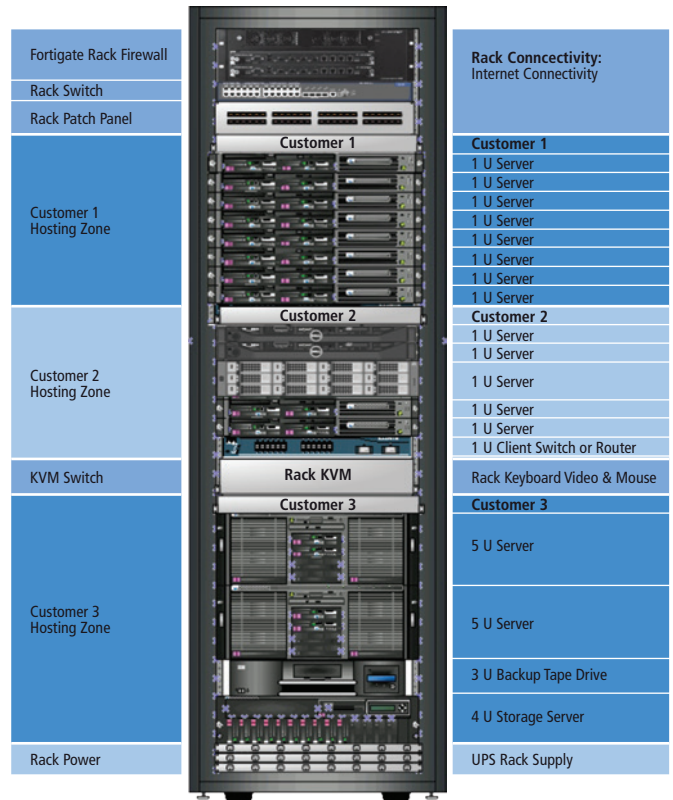

We offer customers the ability to house servers in our dedicated server hosting racks. These servers can be rack-mounted or blade enclosed servers. NST has links from multiple ISP's into the data centre facilities.

Not all businesses can afford premium data centres so this shared offering brings cost benefits. Additionally should you decide to rent hardware resources the cost is of a non-capital nature, and you never have to worry about upgrading the equipment as we look after that.

Naturally disaster recovery is simplified given that the heart of your IT is away from your physical business premises, in a far more secure location.

Should you elect for your own IT team to support your servers, access to the facilities can be arranged for your own technical staff. Alternatively you may elect to upgrade the hosting service to a fully managed service and we will undertake the support, maintenance and upgrade tasks on your behalf.

**Join the many organisations enjoying the benefits of utilising these services.**
