MOBILE DEVICE MANAGEMENT

Productivity & Security Risks

UNPROTECTED CORPORATE DATA: All it takes is one lost phone without a password for all your corporate data to become available to anyone.

INTERRUPTED & DISTRACTED EMPLOYEES: HR is the #1 cost for any business, and any disruption to their productivity will hurt your bottom line.

LOST OPPORTUNITY: Staying connected is vital in today's business world. Missing a single e-mail can mean the difference between winning a customer and losing a deal!

Managed Mobile Benefits

Reduce Exposure to Risk
through secure & protected access to corporate data.

Enhance Productivity
ensuring devices are properly configured and eliminating unnecessary distractions.

Increase Profits
our solution will give you the confidence to safely & securely leverage mobile computing as a powerful productivity tool.

- Track data & call usage

Are your employee's smartphones an open door to your secure network & critical data?

IDC reports that 40% of IT decision makers say they let workers access corporate information from employee-owned devices, but 70% of employees indicate that they access corporate networks this way.

Mobile computing is becoming an increasingly vital component of every businesses operation. As end user's access critical business information, communicate with customers, and leverage their mobile device to support their day to day activities, you need to ensure that the same management, security and oversight solutions you rely on for your IT.

Our Managed Mobile Solution is designed to provide enterprise class IT management for mobile devices, at a cost that meets the needs of an SMB.

MOBILE SUPPORT: Leveraging enterprise level best practices & expertise, our Network Operations Centre is available to support all your Mobile Support needs. From wiping a phone's data to tracking its location, our team can handle it all!

MOBILE MANAGEMENT: Since supporting end users alone isn't enough, our management solution will standardise configuration and ensure key features are always available.

MOBILE SECURITY: Our solution will ensure that your business & data are secure by enforcing strict security protocols on every mobile device under management.

MONTHLY REPORTING: Gain insight into your assets, manage costs, ensure all your warranties are up to date, and review support activity on a monthly basis.
