Program Advantages

Increased Productivity: Continuous insight into your network lets us reduce the business impact of IT failure to issue resolution.

Reduced Business Impact from IT Failures: Combining preventative maintenance and remote monitoring means we minimise failures that could impact your business. Your network behaves in a stable and reliable manner.

Reduced Network Downtime through Proactive Maintenance: Through regular, preventative maintenance activities designed to keep your network operating efficiently, we reduce the number of emergency incidents you encounter.

Firewall/Security Management: Regularly viewing firewall logs to determine usage and if there are any attacks. All Anti-Virus software is checked daily.

Program Features

24x7 Advanced Performance Monitoring: Ensures all of the critical network devices that comprise your small business network are healthy and functioning reliably.

Monthly Network Health Review: Dedicated time to review reports and issues that are important to the on-going performance of your network. We translate technology into business terms for you.

Scheduled Preventative Maintenance: Ensures that your servers, PCs and other vital network devices function optimally. This improves reliability and security.

Real Time Optimisation: Keeps your infrastructure optimised through our NOC enterprise-class technology. Critical issues are identified, reported and resolved in real-time.
